

### Amendments to the Specification

Please replace the paragraph at page 7, beginning at line 26, under the heading SUMMARY OF THE INVENTION with the following:

According to the invention, there is provided a hybrid maize plant, designated as 33T17, produced by crossing two Pioneer Hi-Bred International, Inc. proprietary inbred maize lines GE515488 and GE534625. These lines, deposited with the American Type Culture Collection, (ATCC), Manassas, Virginia 20110, have accession number PTA-1304 for GE515488 and accession number PTA-4289 for GE534625. This invention thus relates to the hybrid seed 33T17, the hybrid plant produced from the seed, and variants, mutants and trivial modifications of hybrid 33T17. This invention also relates to methods for producing a maize plant containing in its genetic material one or more transgenes and to the transgenic maize plants produced by that method. This invention further relates to methods for producing maize lines derived from hybrid maize line 33T17 and to the maize lines derived by the use of those methods. This hybrid maize plant is characterized by exceptional yield and the ability to produce high quality white food grade grain with high test weight.

Please replace the paragraph at page 40, beginning at line 2, under the heading DEPOSITS with the following:
